Task-5 : Stay Safe Online Prevention Checklist

To protect yourself from cybercrimes like UPI fraud and online scams, follow these essential safety practices:

General Online Safety Tips:

1. **Never share your OTP, UPI PIN, or bank details** with anyone, even if they claim to be from a bank or company.

2. **Do not click on unknown links** received through SMS, WhatsApp, or email, especially those promising rewards or urgent actions.

3. **Always verify the sender's identity** before responding to payment requests or messages.

4. **Use strong and unique passwords** for your accounts and update them regularly.

5. **Enable two-factor authentication (2FA)** on all important apps like email, banking, and social media.

6. **Download apps only from official sources** like Google Play Store or Apple App Store to avoid malware.

7. **Be cautious while using public Wi-Fi**, especially for banking or financial transactions.

UPI & Financial Safety Tips:

Remember: You do NOT need to enter your UPI PIN to receive money — entering a PIN always means money is being sent.

8. **Never approve unknown 'collect requests'** in UPI apps without verifying the sender.

9. **Do not scan random QR codes** shared by strangers, as they may lead to unauthorized payments.

10. **Always double-check payment details** (name, number, amount) before confirming any transaction.

If You Become a Victim:

12. **Immediately report the fraud on the National Cyber Crime Portal:** https://cybercrime.gov.in

13. **Call the Cyber Crime Helpline: 1930** (available 24x7 for quick assistance).

14. **Inform your bank as soon as possible** to block further transactions.

Point to be remembered: Awareness is your strongest defense. Always think twice before clicking, sharing, or approving anything online.
